

Materials regarding directive 2015/863/EU (RoHS)

FIXTEST Prüfmittelbau GmbH is a manufacturer of contact products, mainly spring contact probes for the Electronic Industry.

On July 1st, 2011 the directive 2011/65/EU of the European Parliament and of the Council on the restriction of the use of certain hazardous substances in electrical and electronic equipment was published in the Official Journal of the European Union and replaced the directive 2002/95/EU on January 3rd, 2013.

As of June 4th, 2015 the list of hazardous substances was amended by 4 substances in directive 2015/863.

FIXTEST Prüfmittelbau GmbH does not manufacture or supply electrical and electronic equipment as defined in the scope of the directive 2011/65/EU in Article 2.

To our knowledge, our supplied products do not contain substances in such a concentration or application which are forbidden in the directive 2015/863/EU.

Additional Information: In regard to recycling of the components in the manufacturing cycle, FIXTEST Prüfmittelbau GmbH offers their customers to take back and scrap used spring contact probes and receptacles free of charge.
